## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

1. (Currently amended) A method for transmitting pre-recorded images using telecom networks, the method comprising the steps of: detecting when a telecommunications apparatus is used by a caller to send a message to a recipient, establishing a connection with a telecommunications apparatus of the recipient, and, thereafter, displaying a supplementary image at the telecommunications apparatus of the caller in addition to, or to replace, conventional connection messages, wherein, if the recipient does not answer during a predetermined time period, then replacing the supplementary image by connection message text, and wherein, if, during transmission of the supplementary image to the caller, a connection is established between the caller and the recipient, transmission of the supplementary image is terminated.

## 2-3. (Cancelled)

- 4. (Original) The method of claim 1, wherein a message to be transmitted to the recipient from the caller is a mixed media audio/video message and, wherein a supplementary image is presented for viewing to the caller prior to connection between caller and recipient being established or prior to transmission of the message from the caller.
- 5. (Previously Presented) The method of claim 1, wherein the image has at least one of an advertising content, an information content, or a combination thereof.
- 6. (Original) The method of claim 1, wherein a supplementary image is presented for viewing to the caller prior to connection between caller and recipient being established.
- 7. (Original) The method of claim 1, wherein supplementary images are conveyed only to telecom system users who have indicated a willingness to receive such images.

Appl. No. 09/858,174 Amdt. dated April 14, 2009 Reply to Office Action of October 28, 2008

- 8. (Original) The method of claim 1, wherein supplementary image insertion is available to all network service providers.
- 9-17. (Cancelled)

Appl. No. 09/858,174 Amdt. dated April 14, 2009 Reply to Office Action of October 28, 2008

- 18. (Currently amended) Apparatus for transmitting pre-recorded images using telecom networks, whereby when telecommunications apparatus is used by a caller to send a message to a recipient, a supplementary image is visually transmitted from messaging equipment to the caller in addition to, or to replace, conventional connection messages, wherein the apparatus comprises: means for detecting a signal on a telecom system indicating that there is an incoming message transmission; means for establishing a connection with a telecommunications apparatus of the recipient; and means for responding to this detection and connection by conveying a supplementary image or images to the caller in addition to, or to replace, conventional connection messages, wherein, if the recipient does not answer during a predetermined time period, then replacing the supplementary image by connection message text, and wherein, if, during transmission of the supplementary image to the caller, a connection is established between the caller and the recipient, transmission of the supplementary image is terminated.
- 19. (Previously presented) The apparatus according to claim 18, wherein the apparatus is arranged to insert a supplementary image or images into the message and relay the message with inserted supplementary image(s) to a recipient.
- 20. (Original) The apparatus of claim 19, wherein in the case of text messaging the supplementary image(s) is/are inserted in a part of a message from the caller and will be visible to the recipient on retrieval of the text message.
- 21. (Original) The apparatus of claim 18, wherein a message to be transmitted to the recipient from the caller is a mixed media audio/video message and, wherein a supplementary image is presented for viewing to the caller prior to connection between caller and recipient being established or prior to transmission of the message from the caller.
- 22. (Original) The apparatus of claim 18, wherein the apparatus comprises cellular/wired telecommunications systems and other terrestrial or satellite transmissions, or email transmission systems capable of receiving text messaging.

Appl. No. 09/858,174 Amdt. dated April 14, 2009 Reply to Office Action of October 28, 2008

- 23. (Original) The apparatus of claim 22, wherein the telecommunications system is configured so as to convey such supplementary images only to system users who have indicated a willingness to receive such images.
- 24. (Original) The apparatus of claim 18, wherein the supplementary image also has an audible message associated with it and transmitted to the caller during a predetermined time period.
- 25. (Original) The apparatus of claim 24, wherein the predetermined time period is selected by an advertising organisation.

26-34. (Cancelled)
